From Analyst to Threat Hunter

How to Build the Skills for Tomorrow's Hottest Cyber Jobs

Whether you're a current cyber pro looking to specialize, or new to the industry and looking for direction, Focal Point Academy's lead cyber workforce expert can give you the insight needed to fast-track a career into today's most in-demand cyber jobs, like Threat Hunting and Reverse Engineering. We'll profile the top job roles for the next few years, break down the knowledge, skills, and abilities required in each, and show you how to build a training plan that gets you the job you want. And best of all, we'll end with a special offer designed to help jump start the process for you and your team.

In this Webinar, you will learn:

- How to build the foundational skills for today's cyber jobs
- How to prepare for the top cyber specialties of tomorrow
- How to go from a foundational skillset to a specialized skillset
- How top cybersecurity organization are developing their employees
- How you can get started with Global Knowledge and Focal Point Academy
